

GPR-100 *GLOW PLUG READER*

The new CanDo GPR-100 Glow Plug Reader offers a quick and accurate solution for Technicians and Do-it-Yourselfers to easily read diesel glow plugs. By eliminating the glow plug removal process and testing the glow plugs on the vehicle you will save time and money. Self calibration with Multi-Voltage capability expand the readers ability to include ceramic type glow plugs.

FEATURES & BENEFITS

- Comfortable Ergonomic Design for ease of operation
- Easy to read screen with Graphic display of actual condition and resistance value
- Built in LED light for testing in low light conditions
- Plug in diagnostic cables for ease of replacement (Prevents the need to replace the whole unit in case of cable damage)
- Save time and money by not having to remove glow plugs for testing

GPR-100 FUNCTIONS

- Self calibrating with single button operation for on, off, and calibration
- Reads condition while the audible tones notify for high resistance, shorted, and other conditions
- Multi-Voltage capability for reading glow plugs of all types including ceramic
