

# Reset + *OIL OR SERVICE REMINDER LIGHT ON?*

Today's vehicles require the Oil Service light to be reset after a routine oil change. Many vehicles require a complex procedure to perform these resets with instructions often too difficult to find. The Reset + makes it easy with step-by-step instructions right on the screen! Additionally, some European vehicles have many maintenance resets such as air filter, brake pad service or cabin filter replacement - the Reset + performs these along with many other electronic OBD maintenance resets. The Reset + is perfect for repair shops, lube shops and Do-it-yourselfers.
